PROFILE SUMMARY

I am a Fullstack Developer who is passionate about creating beautiful, user-friendly and interactive websites. I'm proficient in HTML, CSS, and JavaScript, and I have strong skills in React Js and Bootstrap CSS. I take design ideas and turn them into websites that look good and function well, aiming to create a positive user experience.

PROJECTS

WEATHER APP

- A real time weather web app built with HTML, CSS, and JavaScript

- Implemented user-friendly interface and Progressive Web application functionality that allows the web app to be installable and work like a mobile app

NOTES APPLICATION

- Developed a Lightweight Note / Jotting application using localStorage
- By utilizing LocalStorage, Notes provides secure and persistent storage for your notes, independent of internet connectivity.

TODO-LIST APPLICATION

- **Effortless Task Management**: Add, check, and delete tasks with intuitive and user-friendly interfaces.
- DOM Manipulation Implementation: Witness the magic of JavaScript firsthand as dynamic animations and real-time updates bring your to-do list to life.

CERTIFICATIONS

- LASU CBT 18 Python Programming Fundamentals

- UDEMY - Object Tracking using Python and OpenCv

- UDEMY - Computer Vision: Face Recognition Quick Starter in Python

- UDEMY - YOLO: Automatic License Plate Detection & Extract text App
